Office Action Summary	Application No. 10/751,721	Applicant(s) KENNETT, DEAN	
	Examiner Joseph D. Pape	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Claims 8-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/28/05.

Claim Objections

2. Claims 3-7 are objected to because of the following informalities: In claim 3, line 4, --the—should be inserted before “first”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the Japanese reference '222.

Art Unit: 3612

The Japanese reference '222 discloses the claimed invention including support member 7 and connector 15.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverwood.

Silverwood discloses the claimed assembly including a support member 12, and a connector 10 with a head portion and ledge. The assembly of Silverwood is considered to be capable of functioning as a window support as recited.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Silverwood in view of Fanciullo.

Silverwood discloses the claimed invention except for the connector being threadably disposed through the passageway of the support member.

Art Unit: 3612

Fanciuollo discloses a support member 250 with a passageway threadably disposed on a connector 40 in order to secure the support member to the connector prior to use.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to threadably dispose the connector through the passageway of the support member of Silverwood as taught by Fanciuollo in order to maintain the support member on the connector prior to use for ease in using the assembly.

8. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Silverwood.

Silverwood discloses the claimed invention except for the specific dimensions of the support member and connector.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the support member and the connector to have the claimed dimensions as an obvious matter of choice of an assembly of a size suitable for the intended use absent a showing of the criticality thereof.

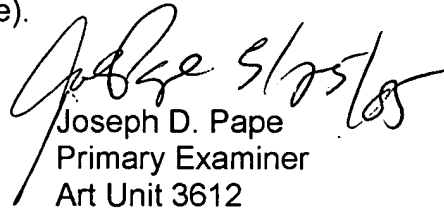

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show other assemblies functionally and/or structurally similar to that of the current invention.

Art Unit: 3612
